**e) APPLICATION NO: 6.64.120.F.TPO 22/01111/TPO**

**PROPOSAL: T1** - Beech - Removed and the stumps treated to prevent regrowth. Location of tree growing near building/structures provides insufficient space and in particular, for the wall garage to co-exist with the trees in their location. Ideally, replacement trees should be established close by but in locations that provide sufficient separation to avoid repeating the current problems of direct damage. Considering the limited availability of space between the garden boundary and the neighbour's garage to the north, I would suggest that a small to moderate-sized and naturally upright species of the tree be selected to replace the trees form and limit the need for ongoing pruning.

**HBC Planning narrative as follows:**

Further to a report received advising us of a possible breach of planning control at the above location, I write to inform you that an investigation has been carried out.

The outcome of the investigation is as follows - As the additional height is to the rear of the site the fencing does not impact detrimentally on the neighbouring properties in terms of overbearing or overshadowing and therefore it is not the council's opinion that enforcement action is warranted and therefore the case is closed.

The outcome of the investigation is as follows - Thank you for all the information that has sent in I visited the site last week, works have taken place regarding a Car Park that is being put in.
