Reporting speeding

Hello all

There has been reports of speeding in and around Boroughbridge town.

There is a process in place in order to determine the most appropriate action to be taken in regards to speeding issues based on data collected.

This process is the Speed Management Protocol and is essentially a way for members of the public to submit complaints about a road they are concerned about, which we will then collect data from and implement the best outcome from the speed data. Roads with a relatively high speeding problem will be referred to the Safety Camera Team for enforcement or to Highways to put in an engineering solution (speed bumps / chicanes etc). Roads with a relatively low or no speeding problem will be referred to the Community Speed Watch scheme.

The concern form can be access by yourself or the public via the NYP website on this link and click on the "tell us about a location" button: Community Speed Watch | North Yorkshire Police. **Or via the link below:**

https://www.northyorkshire.police.uk/advice/advice-and-information/wsi/watch-schemes-initiatives/community-speedwatch/community-speed-watch/

The more reports made of concern of speeding the more likely the road will be looked into. So if there are speed concerns on your roads please make a report and encourage others on your road to do so!!!

Also. If I can ask individuals to collect vehicle registration's of vehicles speeding if it is safe to do so and then send them to me with the time, date and location of speeding. I will then send a speed warning to the vehicles in question. Please email to the email below.

Kind regards

Jack Gudger
